(was Immu.Rapid)

**AMENDMENTS**

In response to the Office Action dated 10/06/2004, please amend the above-identified application as follows:

**In the Claims:**

(Amended) 1. A method for assessing a patient for the presence of a malignancy, comprising:

- a) obtaining a biological specimen from a patient, said specimen comprising a mixed cell population suspected of containing hematopoietic and non-hematopoietic malignant cells;
- b) preparing a sample wherein said biological specimen is mixed with a detectably labeled [ligand] EpCAM antibody which reacts specifically with the malignant cells, to the substantial exclusion of other sample components;
- c) contacting said sample with at least one reagent which also specifically labels said malignant cells;
- d) analyzing said sample to determine the presence and number of labeled cells, detection of said cells indicating the presence of malignancy, the greater the number of cells present, the greater the severity of the malignancy; wherein the method further comprises
